

Annual Safety and Training — Combined Report

Semi-agent pipeline · 3 source documents · generated 2026-09-16

Method

Each source PDF was converted to Markdown (text and tables extracted; figures noted by caption, never OCR'd), summarised by a local model, and its tables parsed back into a dataset. Numbers that appear only inside a figure are absent from this report by design.

Provenance

- Pipeline: semi-agent (fixed sequence, human checkpoint), run 2026-09-16 10:49
- All 3 summaries generated by `mock:demo`

Documents

site a workshop report

Source: `site\_a\_workshop\_report.pdf` · summarised by `mock:demo`

This document describes workshop safety procedures. It covers pressure checks, protective equipment and reporting duties for apprentices.

site b hydraulics report

Source: `site\_b\_hydraulics\_report.pdf` · summarised by `mock:demo`

Inspect a hydraulic system for leaks and pressure faults before operation.

site c electrical report

Source: `site\_c\_electrical\_report.pdf` · summarised by `mock:demo`

Identify the main components shown in a standard electrical circuit diagram.

Extracted data

12 rows were parsed from tables across 3 documents. The table and the chart are in the companion file `report.html`.
